

# MAXIMISING PATIENT OUTCOMES THROUGH EVIDENCE-BASED DECISION-MAKING IN ADVANCED GASTRIC AND GEJ CANCER

Monday 22 October, 2018 | 13:00-14:30 | Hall B4 – Room 19 | Messe Munich, Munich, Germany

Dear Colleague,

It is my pleasure to invite you to the Lilly-sponsored satellite symposium, **'Maximising Patient Outcomes Through Evidence-Based Decision-Making in Advanced Gastric and GEJ Cancer'** taking place at the ESMO 2018 Congress.

During this interactive educational session, our expert faculty will discuss the importance of pathology for making informed treatment decisions as well as the role of surgery in oligometastatic disease. They will provide guidance on the need for appropriate nutrition for maintaining fitness and performance status to extend survival by enabling patients to receive treatment first line and beyond.

Finally, the faculty will share their knowledge and best practices using two illustrative Tumour Board style clinical cases that will highlight the benefits of a multidisciplinary approach for managing patients with gastric and GEJ cancer as well as the value of evidence-based decision-making for selecting and sequencing treatments. Throughout the symposium delegates will be able to participate by voting, asking questions and sharing views and experiences on key topics via interactive devices.

We hope this session will be both stimulating and educational, and that it enhances learning to assist in making treatment decisions in daily clinical practices.

Yours sincerely

**Florian Lordick**  
Symposium Chair  
University of Leipzig  
Leipzig, Germany

## AGENDA

- 13:00 Welcome and introduction**  
**Chair: Florian Lordick**  
*University of Leipzig, Leipzig, Germany*
- 
- 13:05 How can pathology inform treatment selection?**  
**Wilko Weichert**  
*Technical University Munich, Munich, Germany*
- 
- 13:20 The role of surgery in oligometastatic disease**  
**Mitsuru Sasako**  
*Yodogawa Christian Hospital, Osaka, Japan*
- 
- 13:35 Nutrition and survivorship: Is there a link?**  
**Was Mansoor and Marc Abraham**  
*The Christie NHS Foundation Trust, Manchester, United Kingdom*
- 
- 13:45 Two illustrative and interactive Tumour Board style case study discussions**  
**Christine Brezden-Masley**  
*University of Toronto, Toronto, Canada*  
**Was Mansoor**  
*The Christie NHS Foundation Trust, Manchester, United Kingdom*
- 
- 14:25 Closing remarks**  
**Chair: Florian Lordick**  
*University of Leipzig, Leipzig, Germany*
- 
- 14:30 Symposium closes**
