SPEAKING WITH A SINGLE VOICE FOR ALL CANCER PATIENTS

Jana Pelouchova, ECPC Secretary, Diagnoza CML

EU RARECARE PROJECT II – 3 year Project

AIMS

- to provide comprehensive information on rare cancers to the community at large (clinical oncologists and physicians, researchers and health authorities, patients and their families).
- to improve the timeliness and accuracy of diagnosis, to facilitate the access to high quality treatment for patients with rare cancers, to map centres of expertise for rare cancers in Europe and to reduce survival differences across Europe.

ECPC WP Leader: WP 7 Information for patients with rare cancers

Objectives of this Work Package:

- i. To identify centres of expertise for rare cancers with the support of the partners.
- ii. To develop and disseminate information for patients including patients' associations dedicated to rare cancers.

Outcomes:

- i. Development of an informative toolkit to inform patients on rare cancers
- ii. Creation of a list of centres of expertise for rare cancers to which patients can be referred to

- Based on the information material developed in collaboration with the project partners, ECPC will organise a number of workshops to train the patients advocates to inform, educate and activate other rare cancer patients.
- Communication channels will include web sites, twitter account, news letters and events.

Thank you very much!
