

ESMO Immuno-Oncology Congress 2018 Industry Satellite Symposium

SATURDAY 15 DECEMBER | 13:00–14:00 CET

Room C, Palexpo, Geneva, Switzerland

Harnessing the power of immunotherapy in advanced NSCLC: how do we navigate the increasingly complex patient pathway without an oncogenic driver?

INVITATION

Dear Colleague,

On behalf of the faculty, I am delighted to invite you to join us at a Satellite Symposium that will take place during the ESMO Immuno-Oncology Congress 2018 this year.

During this engaging agenda, myself and the faculty will address challenges we all face in our clinical practices, and discuss the available evidence and changing treatment paradigms for patients with NSCLC without an oncogenic driver. We will encourage you to ask questions that are at the forefront of your minds and most pertinent to your clinical practice.

I'm sure you will agree that this Satellite Symposium promises to be both stimulating and informative. I hope that you can join us as we continue our endeavours to optimize patient outcomes in NSCLC.

With regards,

Sanjay Popat (Chair)

*The Royal Marsden NHS Foundation Trust,
London, UK*

PROGRAM

13:00 Introduction and welcome – where are we now?

Sanjay Popat, UK

13:10 Driving forwards with immunotherapy in NSCLC – latest advances

*Marina Chiara Garassino, Italy
Maurice Pérol, France*

13:30 Navigating the complex patient pathway in NSCLC without an oncogenic driver (interactive case presentations)

*Enriqueta Felip, Spain
Sanjay Popat, UK*

13:50 The journey continues (questions and summary)

Sanjay Popat, UK

14:00 Meeting close
