

# ESMO Breast Cancer 2019

AstraZeneca and MSD joint satellite symposium

## Hitting Breast Cancer Where It Hurts

Vienna Hall, 2 May 2019  
6:30–7:30pm

*No registration required, food will be provided*

### Breaking cancer's repair system – New approaches to breast cancer care

Targeted therapies together with accessible genetic testing are changing how we think about breast cancer

We'll take a look at therapies for patients with gBRCAm HER2-negative advanced breast cancer, now and in the future

We'll hear from our expert clinical panel how these therapies may be practically implemented to improve patient outcomes

### An expert multidisciplinary panel presenting a practical approach to improve outcomes in gBRCA mutated breast cancer

**Prof. Dr Christian Jackisch**

Klinikum Offenbach GmbH,  
Germany

**Prof. Dr Tjoung-Won Park-Simon**

Hannover Medical School,  
Germany

**Prof. Andrew Tutt**

Institute of Cancer Research,  
UK

**Prof. Dr Christian Singer**

University of Vienna,  
Austria

Join our symposium to discuss  
how we can hit breast cancer ...  
where it hurts

This meeting has been organised and funded by AstraZeneca
