CHAIR
Ian **Chau**, UK

Metastatic gastro-intestinal cancer

How to deal with the complexity of multiple available drugs across lines of treatment?

The ESMO Colloquia are innovative sessions within the Congress programme that bring together experts to discuss evolving areas of interest to the oncology community. The Colloquia are organised by ESMO and supported by the industry in a unique collaboration making them the perfect complement to the scientific and education programme of the Congress.

This educational activity is provided by ESMO and supported by Lilly Oncology.

Lilly | ONCOLOGY

This colloquium is not organized or endorsed by Imedex.

Colloquium objectives

- Review the optimal treatment options in successive lines of available therapies
- Discuss best sequencing based on level of evidence
- Learn about the use of biomarker for decision making
- Analyse the present guidelines, algorithms and ESMO-MCBS scores as tools for selection

4 July 2019
Thursday

13:15

Introduction

Ian Chau, Sutton, UK

13:20

Metastatic gastro-oesophageal adenocarcinomas

Salah Al-Batran, Frankfurt am Main, Germany

13:45

Metastatic colorectal cancer

Fortunato Ciardiello, Naples, Italy

14:10

Unresectable or relapsed hepato-cellular carcinomas

Jean-Luc Raoul, Saint-Herblain, France

14:35

Conclusions
