

ESMO 2019 Industry Satellite Symposium

# Precision in practice: a new era for oncology treatment

Precision oncology

**Event date:** 29 September 2019

**Venue:** Santander Auditorium, Hall 3, Fira Gran Via, Barcelona, Spain

**Time:** 18:30–20:00

**Chair:** Manfred Dietel

## 1. Precision oncology: where are we today?

**Speaker:** Elena Garralda

During this session, we will review the current precision oncology landscape with a focus on NSCLC and thyroid cancer, as well as the latest clinical research data on emerging biomarkers such as RET and NTRK.

## 2. Leading from the lab: pathology in focus

**Speaker:** Erik Thunnissen

With an increasingly complex biomarker landscape, pathologists play a pivotal role in oncology. Gain expert insights on testing methodologies with a focus on NSCLC and key considerations for developing optimal testing strategies in practice.

## 3. The molecular tumour board: a team effort

**Speaker:** All speakers

The use of Multi Disciplinary Teams (MDTs) and effective team collaboration can lead to improved treatment outcomes. During this interactive discussion, a multidisciplinary panel will review a case study and demonstrate live how MDTs interact during a molecular tumor board and how shared perspectives can help drive better treatment decisions in practice.

## 4. Immuno-oncology biomarkers in the future

**Speaker:** Mariano Provencio Pulla

During this session, we will explore the latest clinical research data, and discuss possible future personalisation in immuno-oncology.
