

2020: New decade, new treatment choices in GU cancer

Available on demand from Tuesday 22 September 2020 09:00 CET

Chair's invitation

Dear Colleague,

On behalf of the faculty, I am pleased to invite you to the Merck KGaA, Darmstadt, Germany-Pfizer Alliance satellite symposium '2020: New decade, new treatment choices in GU cancer'. The symposium will be available on demand from **Tuesday 22 September until Tuesday 29th September** during the ESMO Virtual Congress 2020.

2020 marks the start of a new decade in which new treatment options have emerged, providing new choices in the management of advanced RCC and UC. In a rapidly-changing environment, we must understand how these emerging therapies may help us achieve the best possible outcomes for our patients.

Please join our virtual satellite symposium as we explore the latest advancements in the GU cancer treatment landscape from the perspective of both medical evidence and use in clinical practice. There will also be a **live Q&A session** on **Tuesday 22 September at 16:15–16:45**.

We look forward to welcoming you virtually for what promises to be a valuable and informative symposium.

Cora Sternberg, Chair
Weill Cornell Medicine, New York, USA

Programme

Chair: **Cora Sternberg**
