

Elucidate Metastatic Prostate Cancer Targets With Radioligand Therapy and Molecular Profiling

Advancing Precision Medicine
in Prostate Cancer

On-Demand from 14 – 29 September 2020

Live Q&A
24 September
16:30 – 17:00 CEST

Agenda

Welcome and introduction	Prof. Johann de Bono Chair, UK
Navigating the complexity of advanced prostate cancer treatment management	Prof. Nicholas James UK
Case study: a look at current management strategies for advanced prostate cancer	Prof. Bertrand Tombal Belgium
Getting it right with biomarkers and actionable targets for treatment selection	Prof. Johann de Bono UK
Novel targeted therapies on the horizon: radioligand therapy, PARP and tyrosine kinase inhibitors, and immuno-oncology agents	Dr. Michael Morris USA
Panel discussion	All
