

ESMO 2014 INDUSTRY SATELLITE SYMPOSIUM

DESIGNING THE FUTURE TREATMENT PARADIGM OF mCRPC

Saturday 27 September 2014, 18:00–19:30

Valencia Auditorium, IFEMA – Feria de Madrid, Madrid, Spain

Please join us for the Astellas symposium 'Designing the future treatment paradigm of mCRPC'

With significant advances in the development of novel therapies, the armamentarium of drugs available across the prostate cancer disease continuum is expanding. As a result, treatment decisions in the management of patients with mCRPC are becoming more complex. Join our notable faculty for what will be an engaging and informative discussion on how to navigate the evolving treatment landscape of mCRPC. In addition to presenting new data, the panel will explore the clinical decision-making process and factors that may predict response to different treatment options. Throughout the symposium, the audience will be invited to pose questions on the impact of the growing number of treatments on current clinical practice.

Astellas Pharma EMEA has organised and funded this symposium, selected speakers, and had joint input into presentation content.

ENZ/14/0053/EUc Date of preparation: July 2014

Agenda

- 18:00** **Welcome and introduction**
Cora Sternberg, Italy (Chair)
- 18:05** **The evolving mCRPC treatment landscape in 2014**
Robert Jones, UK
- 18:30** **Exploring treatment options for mCRPC:
Selecting the right treatment for the right patient**
Cora Sternberg
- 19:00** **Understanding disease biology to design the future
treatment paradigm in mCRPC**
Charles Ryan, USA
- 19:25** **Summary and close**
Cora Sternberg
