

ESMO 2021 Industry Satellite Symposium

From Breast Cancer Biology to Therapy

Friday, 17 September 2021,
08:45 – 10:15 CEST, Channel 6

An expert panel of speakers will

- Review of the biology of key biomarkers in breast cancer and their associated targetable traits
- Discussion of next-generation therapies that target key biomarker mutations and their mechanisms of action, with a focus on antibody-drug conjugates
- Evaluate the impact of these recent innovations on patient care

08:45-08:50 CEST

Welcome and introductions

Dr Ian Krop (Chair), Dana Farber Cancer Institute, U.S.

08:50-09:15 CEST

Overview of targetable biomarkers in breast cancer

Dr Thomas Bachelot, Centre Leon Berard, France

09:15-09:40 CEST

The evolution of targeted therapies shaping the future of breast cancer care

Dr Komal Jhaveri, Memorial Sloan Kettering Cancer Center, U.S.

09:40–10:10 CEST

Panel discussion and case studies involving all faculty: Dr Ian Krop (Chair), Dr Thomas Bachelot and Dr Komal Jhaveri

10:10–10:15 CEST

Summary and close

with Dr Ian Krop (Chair), Dana Farber Cancer Institute, U.S.
