PURPOSE

The four-day residential course organised by the European Society for Medical Oncology is a tailor-made activity aiming to provide medical students with insights into the field of medical oncology, before they choose their future specialisation. Through a high-standard, interactive programme, the course will offer a stimulating experience which can guide them in planning a successful career in the profession.

LEARNING OBJECTIVES

- To understand the basic principles of Medical Oncology
- To understand how the main tumour types are approached in the clinic from diagnosis to therapy
- To get close to the practice of Oncology in a multidisciplinary setting, through dedicated workshops focusing on the assessment of clinical cases
- To capture the importance of a molecular definition of tumours in the context of a modern precision medicine
