LEARNING OBJECTIVES

- Understanding the function and biology of CDK4-6 in malignant breast cancer cells
- Information and in-depth discussion on the state of the art and emerging therapeutic strategies integrating CDK4-6 inhibition in breast cancer, both in the metastatic setting
- Presenting novel data on biomarkers of benefit, mechanisms of resistance and combinatorial therapeutic strategies of CDK4-6 inhibition
- Providing an outlook of potential integration of CDK4-6 inhibitors in the adjuvant setting
- Discussing clinical cancer cases to integrate use of CDK4-6 inhibitors in clinical practice
