

Key Targets for ADC Directed Therapy in Breast Cancer

Thursday, May 11, 2023 | 18:30 - 19:30 CEST
Hamburg Hall, Hub27 (Messe Berlin); Berlin, Germany

Objectives

- Discuss the current treatment landscape and the evolving role of ADCs in the treatment of breast cancer
- Elucidate the scientific rationale for ADCs in breast cancer, including an overview of ADC mechanisms of action, technologies, and target antigens
- Evaluate the future potential of ADCs to address unmet needs in the treatment of early and metastatic breast cancer

Ian E. Krop, MD, PhD

Yale Cancer Center,
Yale School of Medicine
New Haven, Connecticut, USA

Barbara Pistilli, MD

Department of Cancer Medicine,
Gustave Roussy
Villejuif, France

Agenda

18:30-18:35	Introduction	Ian E. Krop, MD, PhD
18:35-18:55	Current targets for ADCs approved in the breast cancer treatment landscape	Ian E. Krop, MD, PhD
18:55-19:15	Investigational ADCs and recently identified target antigens in breast cancer	Barbara Pistilli, MD
19:15-19:30	Live Q&A session	Faculty Panel
