

ADCs' Potential Across Tumors

Sunday 22 October 2023 | 18:30 – 20:00 CEST

Valencia Auditorium, Hall 10, IFEMA MADRID, Madrid, Spain

Our expert panel chaired by Dr Tabernero will explore the potential of ADCs for the treatment of cancer across a range of tumors.

The symposium will discuss the technologies which underlie approved and pipeline ADCs.

The expert panel will also focus on ADC development in the context of non-small cell lung cancer, head and neck cancer, and urothelial cancer.

Finally, the panelists will regroup to discuss future directions for the development of ADCs and opportunities in the treatment landscape.

We look forward to you joining us.

Experts

Josep Tabernero (Chair)

Vall d'Hebron Institute of Oncology, Barcelona, Spain

David Planchard

Institut Gustave Roussy, Villejuif, France

Laura Locati

University of Pavia and Istituto Clinici Scientifici Maugeri, Pavia, Italy

Thomas Powles

Barts Cancer Institute, London, UK

Agenda

18:30 – 18:33	Welcome and Introduction	Josep Tabernero
18:33 – 18:43	ADC Technologies in Oncology	Josep Tabernero
18:43 – 19:13	Emerging ADCs in Non-Small Cell Lung Cancer	David Planchard
19:13 – 19:28	Advances in ADCs for Head and Neck Cancer	Laura Locati
19:28 – 19:48	Future Directions for ADCs in Urothelial Cancer	Thomas Powles
19:48 – 19:58	Panel Discussion and Audience Q&A	All panel members
19:58 – 20:00	Closing Remarks	Josep Tabernero
