

The Impact of I-O on the Lung Cancer Treatment Landscape

Chair's Invitation

Dear colleagues,

On behalf of Bristol-Myers Squibb, it is my pleasure to invite you to an industry satellite symposium entitled 'The Impact of I-O on the Lung Cancer Treatment Landscape,' as part of the 2016 European Lung Cancer Conference taking place in Geneva, Switzerland.

In this symposium, we will discuss the role of the immune system in oncology and highlight the latest evidence and rationale that support the use of immuno-oncology therapies, as monotherapy or in combination, as a treatment modality for lung cancer.

Emerging data from the ongoing development of novel agents that modulate immune checkpoint pathways in patients with cancer are very promising, with many of these agents demonstrating activity in both small cell and non-small cell lung cancer. Clinical data from several agents demonstrate the potential for achieving prolonged clinical benefit and provide new hope for these individuals.

Other topics will include clinical considerations for use of immune checkpoint inhibitors such as management of immune-related adverse reactions and ongoing efforts in early-stage lung cancer and in other thoracic malignancies. We anticipate that the high levels of interaction and analysis provided by the symposium will inform and benefit your clinical practice and look forward to welcoming you in Geneva.

University of Lausanne, Switzerland

Programme

- 18:30 **Welcome and Introductions**
Solange Peters, MD, PhD, Switzerland
- 18:35 **I-O Monotherapy: An Emerging New Standard for NSCLC?**
Solange Peters, MD, PhD, Switzerland
- 19:00 **I-O Combinations: A Promising Strategy to Explore Treatment Options for Lung Cancer**
Leora Horn, MD, USA
- 19:20 **Clinical Considerations for I-O Therapy**
Federico Cappuzzo, MD, PhD, Italy
- 19:35 **Panel Discussion and Q&A**
Full panel
- 19:55 **Close and Outlook**
Solange Peters, MD, PhD, Switzerland

Refreshments will be served at 18:00

Wednesday, 13 April 2016 | 18:30 – 20:00
