

ESMO 2023 Industry Satellite Symposium

HER future: Pathways to better care for women with HER2+ breast cancer

Monday 23 October 2023, 18:30–20:00 CEST

Santander Auditorium, Hall 9, IFEMA MADRID, Madrid, Spain

Please join our panel of experts for an engaging and interactive discussion around the pathways to better care for women with HER2+ breast cancer. Our esteemed panel will highlight the importance of holistic and tailored women-centric cancer care to achieve optimal outcomes. The experts will discuss the role of subcutaneous formulations of HER2-targeted antibodies in improving the patient experience, and the added flexibility enabled by decentralised cancer care. These discussions will be followed by a live Q&A, where you will have the opportunity to ask questions to our speakers.

We look forward to seeing you in Madrid or via the live stream!

Prof. Matteo Lambertini
*University of Genoa,
Italy*

Dr Joyce O’Shaughnessy
*Texas Oncology-Baylor
Charles A. Sammons Cancer Center,
USA*

Prof. Lee Soo Chin
