

## Empowering you to put the pieces together.

Roche is not just committed to sequencing. We're committed to shaping its future. Get a glimpse of that future at the European Lung Cancer Conference and see how our passion can help fuel yours.

### Connect | Stand 31

13 April -15 April 2016  
Geneva, Switzerland

### Discuss | Industry Symposium

Palexpo | Room A  
14 April 2016  
18:40 - 19:40

Join our distinguished panel of presenters for an engaging discussion of the use of liquid biopsy in cancer diagnostics. Our speakers will cover the utility of NGS based ctDNA in detecting mutations associated with treatment selection and monitoring, and advanced techniques for improving assay performance. Stay for the question and answer session focused on ctDNA detection and current analytical assay performance and validation efforts.

## ELCC 2016 Industry Satellite Symposium

### *Liquid Biopsy for the Genomic Profiling of Solid Tumors*

#### Agenda

##### 18:40

Is it Time for NGS in Liquid Biopsies?  
Clinical Associate Professor Peter Meldgaard, MD, PhD  
Department of Oncology  
Aarhus University

##### 19:00

CAPP-Seq Circulating Tumor DNA Analysis for Personalized Cancer Detection and Monitoring  
Assistant Professor Max Diehn, MD, PhD  
Department of Radiation Oncology  
Stanford University School of Medicine

##### 19:20

Panel Q&A Discussion - Liquid Biopsy Assay Performance

All Faculty and  
John F. Palma, PhD  
Senior Director of Medical Affairs  
Roche Sequencing

Eric Wang, PhD  
Director of Bioinformatics  
Roche Sequencing

Janet Jin, PhD  
Senior Manager, Oncology Assay Development  
Roche Sequencing
