

What's Next for ADCs in Oncology?

Friday 1 December 2023 | 12:30 – 14:00 SGT
Hall 401, Suntec Singapore Convention
& Exhibition Centre, Singapore

Our expert panel chaired by Solange Peters will explore the potential of ADCs for the treatment of cancer across a range of tumors.

The symposium will discuss the technologies which underlie approved and pipeline ADCs.

The expert panel will also focus on ADC development in the context of novel targets including integrins and the immune system.

Finally, the panelists will regroup to discuss future directions for the development of ADCs and opportunities in the treatment landscape.

We look forward to you joining us.

Experts

Solange Peters (Chair)
Centre Hospitalier Universitaire
Vaudois, Lausanne, Switzerland

Kenneth O'Byrne
Princess Alexandra Hospital,
Brisbane, Australia

Emiliano Calvo
START Madrid-CIOC,
Centro Integral Oncologico
Clara Campal, Madrid, Spain

Agenda

12:30 – 12:35	Welcome and Introduction	Solange Peters
12:35 – 12:55	State of the Art and Perspectives	Solange Peters
12:55 – 13:15	Advances in Integrin Targeting	Kenneth O'Byrne
13:15 – 13:35	Multimodal Immune Targeting with ADCs	Emiliano Calvo
13:35 – 14:00	Panel Discussion, Live Q&A, and Conclusions	All Panel Members
