### LEARNING OBJECTIVES

- Provide a state-of-the-art overview on evidence-based perioperative strategies in various tumour settings
- Deliver an overview on the management of challenging clinical situations faced by practicing oncologists in daily practice
- Understand the role of immunotherapy in diverse cancer settings – focusing on its application in perioperative strategies and its management in special patient populations
- Foster the ability to manage complex oncological cases – emphasizing the use of multidisciplinary and molecular tumour boards to optimize treatment plans and improve patient outcomes in challenging clinical scenarios

---

### ACCREDITATION

The programme of this event has been accredited with **10 ESMO-MORA category 1 points**.  
Recertification is necessary for medical oncologists to remain professionally certified by ESMO. Recertification guarantees that a certified medical oncologist has continued to update his/her knowledge and continues to possess the necessary skills and standards for the practice of medical oncology. For further details please refer to [esmo.org](http://esmo.org).
