

ESMO Asia 2016 Industry Satellite Symposium

Advances in gastric cancer

Chair: Dr Ian Chau

Saturday 17th December, 12:45-14:15 • Hall 404, Suntec Singapore Convention and Exhibition Centre

Learning objectives

After attending this symposium, learners will be able to:

- Discuss the latest surgical and adjuvant treatments for GC according to patient and tumour characteristics, clinical guidelines and novel clinical data
- Assess the latest neoadjuvant and pre-surgery options for GC according to patient and tumour characteristics, clinical guidelines and novel clinical data in an Asian setting
- Describe the latest clinical trial data regarding translational research into metastatic GC therapy
- Evaluate best practice in the management of GC and how this best practice could be applied in their local healthcare setting

Programme

12:45 – 12:50	Welcome and introduction	Ian Chau Royal Marsden Hospital, UK
12:50 – 13:20	The surgical treatment pathway	Mitsuru Sasako Hyogo College of Medicine, Japan
13:20 – 13:45	Optimising patient care in metastatic gastric cancer	Kei Muro Aichi Cancer Center Hospital, Japan
